

Drug Fact Bingo

Instructions

- Distribute a bingo card to each participant. They will also need a pen, marker or tokens to check off completed squares.
- Shuffle the bingo tokens and place them in a container or face-down on a flat surface.
- Draw out a token and call out the name of the drug or drug form. Participants who have the drawn drug on their bingo card will mark it off.
- Use the Drug Fact bingo discussion guide to provide an interesting fact about the drug that has been drawn.
- Repeat this process until the first participant has completed their card and calls out 'Bingo'.

Alternative version: play a 'speed round' of Drug Fact bingo with participants requiring a completed line to win the game. The line may be horizontal, vertical or diagonal.
